

MEASURING for *Partial* DOOR GLASS COVERAGE

**** Include photo for more accuracy ****

SHAAD® Covers

(D - E) (F - G) Show the Glass Exposure wanted: Top and Bottom also Left and Right sides. In this example all 4 sides are equal glass exposure of 2" so measure the full glass edge to edge and minus glass exposure area

A. Measure Total Glass left to right A to A. Subtract "D & E" for actual cover width _____

B Measure Total Glass top to bottom B to B. Subtract "F & G" for actual cover height _____

Example Below:

YOUR NEW COVER SIZE IS - 20 X 24

A to A = 22" Total, minus D & E (1" + 1" = 2") so (22" - 2" = 20" width). Put in width. Same for "B"

B to B = 28" Total minus G & F (2" + 2" = 4") so (28" - 4" = 24" height). Put in height.

****Please check boxes, if needed when checking out on ORDER FORM.****

1. Interior Glass Grill - Yes or No

Showing cover mounted on glass showing partial glass exposure and grills

SHAADS® Door Covers

For all measurements please use a measuring tape which measures in inches. Please measure to the 1/16 of an inch. Example above shows 16 red lines between 1" and 2 inches. Counting red lines from left to right every line is a 1/16 - 2/16 - 3/16 - 4/16 and so on - 4/16 equals 1/4, 8/16 equals 1/2 inch
